PERSPECTIVES ON BRAIN INJURY ACROSS THE LIFE SPAN

Program Description:

This program is designed to update clinicians knowledge of brain injury, current trends in quality and measurement systems, issues related to military services members and the elderly with brain injury as well as life planning for this population.

Target Audience:

Nurses, Case Managers, Social Workers, Speech Therapists, Physical Therapists, Occupational Therapists, Psychologists, and Recreational Therapists.

Conference Objectives:

1. To define primary injury for the traumatic brain injury patient.
2. To identify current trends in outcome and quality measurement systems.
3. To describe the impact of recent advances in neuroscience and their potential impact on available treatment.
4. To describe the role of the role of long term life care planning for brain injury.
5. To identify medical, psychological, vocational, family, and social complications which require consideration in proper discharge planning for persons with TBI.
